Pet Cupid❤️

Find animals available for adoption in your zip-code with the click of a button!

Elevator pitch

- Application that lets user's search for pets available for adoption
- The user can search our third-party API by zip code.

Concept

- Pet Cupid is a dynamic application that takes the user's zip code as an input and displays animals up for adoption at local shelters.
- We aimed to promote pet adoption and bring ease of use to the user.

User Story

AS a potential pet owner

I WANT to search my local area by zip code

SO THAT I can find local pets available for adoption

Process

- Technologies used
    - Petfinder API – Oauth Authentication
    - CatAPI – random cat images
    - DogAPI – random dog images
    - Postman
    - Foundation CSS
- Breakdown of tasks and roles
    - Will - fetch data from API
    - Stephen - JavaScript optimization for retrieving data and displaying results
    - Christian – HTML/Foundation CSS infrastructure

Process Cont.

- Challenges
  - Google API
  - Retrieving data for search results
  - Allowing for multiple searches
  - Debugging
- Successes
  - A functioning MVP application!

Demo

❤️

Directions for Future Development

- Narrow search by pet of choice

- Further debugging

- Future Implementation of Google API (maps)
